AWP Rack Deck User WARNING

American Wire Products welded-wire decking for rack storage is designed and manufactured in conformance with ANSI standard MH26.2 for loads that are static and uniformly distributed over the entire surface of the rack deck and within the allowable load capacity rating. Users shall not permit welded-wire rack decking to be used as a walkway or platform for personnel. **FAILURE TO ADHERE TO THESE GUIDELINES COULD RESULT IN SERIOUS INJURY.** Loads should be placed onto decking rather than dropped or pushed.
