

# A UNIQUE PART OF THE AMERICAN EXPERIENCE

As a corporation, we are determined to become the nation's leading supplier of wire mesh material handling storage products, and to be recognized as such by end users, distributors and others within the industry.

Every day our goal is to have our customers and dealers enjoy a remarkable new business experience. We call it the American experience.

It starts from the moment we get your order. We check every order. Part numbers, quantities, prices and delivery dates are all verified. When we're sure it's right, it's manufactured and shipped. We're equally thorough in checking your invoice. At AWP, you won't be billed for work you didn't authorize or products you didn't want or receive.

With AWP, you'll always be able to talk to someone who's knowledgeable about your order and ready to answer any questions or respond to any requests you may have.

The American experience is made up of more than the intangibles of doing business with us. It's as solid as our products. That's why we went through the arduous process of earning ISO 9001/QS-9000 certification, the international standard for quality. Why would we want it when our products are sold primarily in the United States? Because we wanted to give our customers world-class quality.

We'd like to put our experience and our products to work for you. For information about our products and our service, please call 800-666-9938 or visit our Web site at [www.awpind.com](http://www.awpind.com).

# AWP Industries, Inc.

## June 6th is a Historic Day at AWP Industries.

On June 6, 1990, American Wire Products was incorporated. It marked the start of a new era in our industry.

Craig F. Chamberlin, our founder, introduced a new business model to the metal-working industry, a model that adhered to the highest international quality standards; a model centered around the customer; a model that knew that a product may be made of metal, but a business is made of people.

Today AWP Industries, Inc.—our official corporate name since January, 1995—is a highly diversified, customer-focused, ISO 9001/QS-9000-certified company. Our 221,091 sq. ft. building—located on a 15-acre site in Frankfort, Kentucky—houses state-of-the-art, automated equipment and a unique team of highly skilled and experienced metal-working professionals. It's a combination that permits us to maximize productivity and achieve very high economies of scale.

To meet the varied and specialized metal fabrication requirements of our customers, AWP created three separate divisions.

## American Wire Products

The American Wire Products division is one of the nation's largest suppliers of wire mesh rack decking and both rigid and folding containers, sold primarily through material handling dealers.

## AWP's Welded Assemblies

AWP's Welded Assemblies division is the nation's largest supplier of steel corrugated bulk containers, marketed under the brand name of American Bulk Containers.

## American Fabrication and Forming

American Fabrication and Forming provides contract manufacturing of metal stampings and roll forming to a select array of world-class customers.
