

EVERY GOOD
DESIGN
IS BROUGHT TO LIFE
WITH THE
RIGHT
ACCESSORIES!

Storage..., distribution..., manufacturing....

Using American Wire Products' decking accessories and special designs to complement your wire decks, can fulfill and simplify your application.

Sort and separate products using wire mesh dividers, or create a backstop to prevent product from falling off the back of your rack system. Let AWP make storage simpler for you!

Wire Mesh Decking Accessories & Special Designs

American Wire Products' Wire Mesh Decking Accessories and Special Designs can simplify complicated or unique storage requirements.

Wire Mesh Decking Accessories:

- Wire Mesh Hanging Dividers
- Clip-on Dividers
- Clip-on Flu Space Dividers

All Wire Mesh Decking Accessories made specifically for AWP Wire Mesh Decking. Dividers can be made to install front-to-back or left-to-right in rack system.

American Wire Products' Wire Mesh Accessories are economical options that allow storage separation and can also prevent product from falling off the rack when used as a backstop.

Wire mesh hanging dividers are easy to install. These dividers simply hang from the wire decking on the above rack level. Wire mesh clip-on dividers are also easy to install. With the tap of a mallet, the clips slip tightly and securely over the wire. Various mesh designs are available.

Top six reasons your American Wire Products' Wire Mesh Decking Accessories and Special Designs are best to complete your application:

- AWP is a leader in wire mesh design and manufacturing.
- In-house design department to assist with special applications.
- Wire mesh designs meet local fire and safety standards.
- Wire mesh designs are virtually maintenance free.
- Ability to purchase all wire mesh products from one manufacturer. This increases efficiency, which in turn lowers costs. Also, it combines product for shipment to potentially lower shipment costs.
- Testing program ensures weight capacity rating as defined by industry standards (ANSI Standard MH26.2).

Wire Mesh Special Decking Designs:

- Heavy-duty channels will give your wire decking greater capacity strength (+6000-lbs loads).
- Metal strips can be added to your wire decking for heavy, point-loaded applications.
- A reverse waterfall can be added on the back of your wire deck to create a backstop.
- Deck extensions or additional decking can bridge spaces between rack systems for added storage space.
- And much more! Give us a call!

Right: Special deck design. Two metal plates run front-to-back for a point-loaded item. Also, a reverse waterfall on rear of deck was added to prevent load from falling off the back of the rack.
