

Mini-Bulk Containers

Manufactured by American Bulk Containers, a division of AWP Industries, Inc.

It is true what they say, "Good things come in small packages."

However, most 'small packages' are not quite so strong! American Bulk Containers' Mini-Bulks hold up to 3,000 lbs.!

These small but powerful containers gain strength from a 12-gauge, 2" X 2" rolled-channel structure base.

USES & APPLICATIONS

- Mini-bulks are ideal for storing, shipping, and transferring a multitude of products.
- Mini-bulks are ideal for small applications such as:

- a. 'WIP' Items
- b. metal stampings
- c. scrap/metal shavings
- d. tools and many other items!

We make stacking even easier with larger, 4" X 4" rounded targets and 2" X 2" pyramid-style caps.

Solid, heavy-duty structure base allows storage of small but heavy items!
