

JUST BECAUSE  
OUR CONTAINERS WON'T

**BEND**

DOESN'T MEAN  
WE WON'T.

We're not as rigid as either our Standard Rigid Wire Mesh or our Heavy-Duty Container. True, we've added real muscle to our Rigid Wire Mesh Containers by giving them four angle iron rigid corner posts, but we're completely flexible about everything else. In fact, every American Wire Products' Rigid Wire Mesh Container is custom made to your specific application. Just tell us your requirements and our product development engineers will design a container that's uniquely yours. Will we bend? Just tell us how far.

# Rigid Wire Mesh & Heavy-Duty Rigid Wire Mesh Containers

## Rigid Wire Mesh Container

Here's an economical container with real muscle. The stackable Rigid Wire Mesh Container can hold up to 4,000 lbs.— with three more fully loaded containers stacked on top. The sides and end panels— fabricated from 2-gauge wire— are reinforced for added protection while the base is made from heavy-duty roll-formed channel. Corner posts are 3" x 3" x 3/16" angle iron, and the unit features a gusseted foot. All containers are made to size and are available in a number of wire mesh configurations, including 2" x 2", 2" x 4" and 4" x 4". Our Rigid Wire Mesh Containers also come in a knockdown version for shipping and storage when empty.

## Heavy-Duty Rigid Wire Mesh Container

In this corner, weighing in at 6,000 lbs. capacity, the heavy-duty champion. It's the toughest, strongest, most unbending wire mesh container there is. You can put 6,000 lbs. of product in it and stack three more on top of it— each with 6,000 lbs. That's 24,000 lbs. of product.

Constructed of heavy-duty angle and tubular steel, the base features runner bars, stacking caps and targets. The half-drop side or end gates offer easy access. Easy to clean with just a hose or steam, it's virtually maintenance free.

As rigid as our Heavy-Duty Wire Mesh Container is, it gives you a lot of options. You can increase or decrease the gauges on the sides and bottom. If you don't want the heavy-duty tube for the base and frame, other configurations are available.

## Some strengths of American Wire Products' Heavy-Duty Rigid Wire Mesh Containers:

- Put 6,000 lbs. in it. And stack three more on top.
- Tubular steel or 3" x 3" x 3/16" angle iron corner posts
- Tube and angle base construction
- Heavy-duty locks
- Half-drop sides and ends or lift-up sides and ends provide easy access
- Heavy-duty hinge clips
- 2-gauge reinforced welded wire mesh sides and bottom
- Powder coat finish
- Highly visible inventory
- High strength-to-weight ratio

## Some strengths of American Wire Products' Rigid Wire Mesh Containers

- Put 4,000 lbs. in it. And then stack three more on top.
- Four angle iron corner posts, each 3" x 3" x 3/16", with stacking gussets for super container strength
- Reinforced base of 13-gauge steel for stability and longevity
- 2-gauge wire base, sides and end panels, welded in 2" x 2" mesh pattern
- Side and end panels are reinforced
- Available in knockdown configurations for return shipping and storage
- Optional caps and plugs add stacking security
- Wire mesh in 2" x 2", 2" x 4" and 4" x 4" configurations
- Powder coat finish
- Provides for quick visual inventory
- Low tare-weight-to-cargo load

Options available for both the Rigid and Heavy-Duty Rigid Wire Mesh Containers include crane eyes, gates, Kanban plates, tags and identification numbers, security lids, dividers and four runner bars for use on conveyors.

## A unique part of the American experience

We've made the international standard for quality— ISO 9001/QS-9000— a unique part of the American experience. ISO 9001/QS-9000 quality is accepted in over 90 countries, and now it's here in the heartland of America. We're bringing world-class quality to material handling, shipping and storage systems. Yes, sir, ISO 9001/QS-9000 has found a home in our place. And in your place, too, we hope. To put our experience to work for you, call 1-800-666-9938.
